

II SPANISH SYMPOSIUM ON PHYSIOLOGY AND BREEDING OF CEREALS

CORDOBA 6-7 MARCH 2019

Organized in the frame of the **Research Network on Crop Physiology and Quality for Cereal Improvement** (funded by the Spanish Research Agency)

Aim

To build a fertile environment for the **exchange** of knowledge, and increasing **synergies**, between **scientific groups**, particularly from Spain and the Mediterranean region, working on **physiology, genetics and breeding of cereals**, in order to improve multidisciplinary, impact and internationalization of their research activity.

Programme

Four sessions focused on Physiology, Genetics and Breeding of: **(1) Grain quality; (2) Yield and yield x quality interaction; (3) Biotic and Abiotic Stresses, and (4) Phenotyping and modelling**. Each session composed by an invited "**keynote presentation**", selected **oral communications** and **poster presentations**. Time will also be devoted to discussion / interaction.

Abstracts

Must be limited to **300 words**, in English (UK spelling). At least one author must be registered in the Symposium (up to two abstracts could be submitted per registration made). They will be presented as **ORAL COMMUNICATIONS** or **POSTERS**. Deadline **25th of February 2019**.

Registration

Until December 14th: 225€ (students **175€**) and from **December 15th to March 1st : 300€** (students **225€**). Registration includes participation in the event, Symposium material, coffee breaks, lunch on 6 and 7 March and dinner on 6 March. Registration through the website.
